Mockup A – I really like the color scheme here, I think that it is effective as it matches the rooves of many of the buildings in the main picture and reflects the colors of Munich. I like the navigation bar across the top I think that is also a good choice and the background color for the sections is good too, maybe try lightening it a little bit but otherwise it looks good.

Mockup B – I think that the desktop version of mockup A works better for the topic but I do like the navigation bar that you have on the mobile version for mockup B so maybe incorporate that into the mobile version for mockup A.

Use Mockup A desktop version and the color scheme of mockup A mobile version but add in the navigation bar from mockup B.

Typeface is strong in mockup A along with color scheme.
